

Periodic Progress Report : Third PPR

Project IMPLEMENTING A VIRTUAL GUITAR USING 3-AXIS ACCELEROMETER
:

Status : Reviewed (Freeze)

What Progress you have made in the Project ?

We are now about to complete with the basic model of the guitar.

What challenge you have faced ?

We were not able to convert the analog value to digital value using the ADC properly.

What support you need ?

We required some changes in the program algorithm for which we consulted our guide and came up with some new ideas.

Which literature you have referred ?

We tried to referred the different applications of our main platform for some new ideas online.

Comment by Internal Guide :

Need more precision and better sensing
