

Periodic Progress Report : First PPR

Project IMPLEMENTING A VIRTUAL GUITAR USING 3-AXIS ACCELEROMETER
:

Status : Reviewed (Freeze)

What Progress you have made in the Project ?

We were able to generate a sound using ultrasonic sensor.

What challenge you have faced ?

The beam width of ultrasonic sensor was more than what we expected after testing and so was not able to satisfy our needs upto some level of accuracy.

What support you need ?

We need to vary sound as much as possible with high accuracy,

Which literature you have referred ?

We referred to information and videos on internet especially Youtube related to our project.

Comment by Internal Guide :

Survey and Analyze different Sensors
