Periodic Progess Report : Forth PPR

Project : IMPLEMENTING A VIRTUAL GUITAR USING 3-AXIS ACCELEROMETER

Status : Reviewed（Freeze）

What Progress you have made in the Project ?

Programming is done and currently dealing with the hardware complexities.

What challenge you have faced ?

Technical complication were faced mainly dealing with the components.

What support you need ?

We need to have more accuracy for the strings to be played by the accelerometer and to go into the software part basically the programming in more detail.

Which literature you have referred ?

The description of the board for future innovations.

Comment by Internal Guide :

Needs better precision to make a complete Product instead of project
